

Scalability & Future Plan

Date	06 July 2026
Team ID	
Project Name	Smart Lender - Loan Eligibility Prediction System
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Support limited number of users at a time	Performance may slow with Many users	High
2	Stores data locally	Difficult to manage large datasets	High
3	Basic security and authentication	Risk of unauthorised access	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports small number of users	Deploy on cloud with load balancing
2	Data Storage	Local storage	Use MySQL and PostgreSQL or cloud database
3	Performance	Basic ML prediction	Optimization Model and enable caching
4	Security	Basic validation	Add user authentication, HTTPS and encryption

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
-------	-------------------------------	-----------------	-----------------

Phase 2	Deploy application on cloud	1 month	Better accessibility and availability
Phase 3	Add user login and dashboard	2 months	Improved user management
Phase 4	Integrated real time bank loan data	3 month's	More accurate loan predictions
